HORSETRAIL

During the trail ride be ready to spot various species of birds, iguanas, butterflies and eventually spider monkeys and coatis; our guides will give you an interesting and entertaining commentary along the trails while you pass by a local plantation and follow the path that will lead you to visit a deep natural pit or sinkhole characteristic of Mexico resulting from the collapse of limestone bedrock that exposes groundwater underneath. We will then remount and head back to the ranch, where at the end of the ride you will be given an opportunity to take a refreshing swim in our open air Cenote and enjoy some cool refreshments.

You can't ride? Don't worry, our professional and well trained guides will give you a brief lesson on the basics and then introduce you to our very well trained and very good natured horses. If you still don't feel comfortable then the guides will put a lead rope on your horse. By the end of the ride you'll feel like a pro!
